ToMo

POS SCALE

WEIGH TOGETHER. MOVE TOGETHER.

DIGI®

Form, function, and reliability—all in one little scale.

ToMo is a compact POS scale. Sturdy and lightweight, ToMo is compatible with QR code mobile payments and is designed for connecting with the cloud, making it ideal for open markets and mobile catering configurations. Although small in stature and highly portable, it maintains the full functionality of a POS scale and requires little to no training to operate. The scale complies with fiscal law in major European countries. It also boasts an attractive design and is available in three appealing colors.

Available in 3 colors

Bordeaux Red
Elegant and alluring.

Customer side

Pole type (optional)

Custard Yellow
Friendly and warm.

Earth Gray
Natural and comforting.

Reliable. Powerful. Compact.

ToMo is a scale that you can count on. Lightweight and portable, with all the power of a high-function DIGI scale.

UI | User-friendly operation

Powered by Max POS
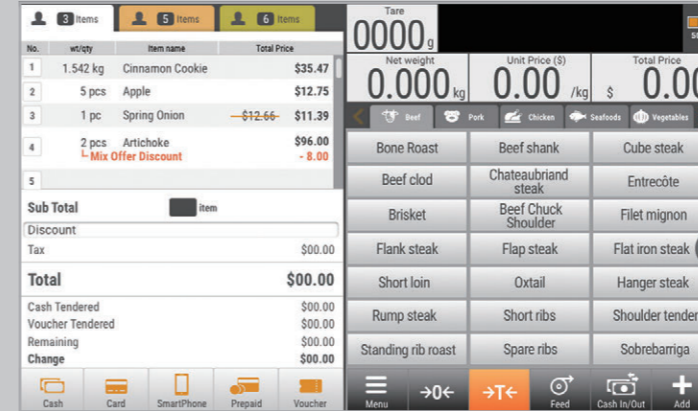

- **No training necessary**
- **Simple one-screen operation**
- **Clear and attractive typeface**
- **Intuitive button layout with pictogram icons**
- **Reduce human error with well-designed interface**

UI utilizes pop-up dialogue boxes, so you can easily view everything on a single screen.

System settings are also simple and easy to use.

Pay with your mobile device.

When finished with a transaction, a QR code with vendor ID and total price will be generated and shown on the customer display. The customer can scan this barcode with a checkout app, confirm the total amount, and pay.

Max POS POS application software

Offers a quick and easy way to process sales.

MaxPOS is a price computing scale software which adds full POS functions to the scale. In addition to scale functions, it has all the standard functions of a POS and runs on winXP or Linux platforms. By keeping track of the merchandise you weigh and scan, it allows you to collect sales information and keep your inventory up-to-date.

Max Chain

## Web-based back office HQ system application
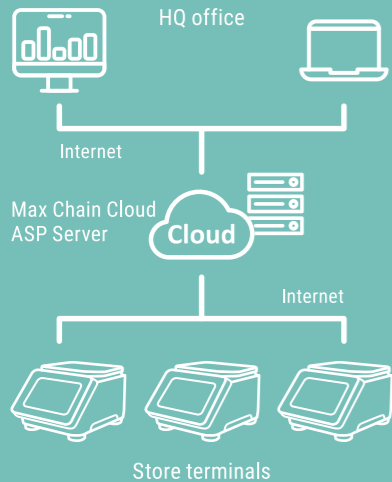

This system provides sales, purchase, and warehouse control, as well as other functions. With Max Chain, you can keep track of your inventory, daily sales, and customer information from any device with an internet connection.
